

Glorieta Gardens Building 8 Water Billing Dispute Chronological Evidence Packet

Account 2745714336 | Meter 61302354 | April 2024 through January 2026

All indexed bills by phase

The comparison below uses every canonical bill record in the Water Intelligence archive. Building 8 is highlighted because it is the disputed meter. The absence of pre-vacancy Building 8 bills is shown as a data gap, not filled with an assumed number.

Account and meter	Address or unit context	Pre-vacancy before Aug 2023	Vacancy and rehab Aug 2023-Feb 2025	Post-rehab Mar 2025-latest

Jan 2026	216,000 gal	\$4,551.86	Post-rehab

Formal request for corrected billing and credit

To: City of Opa-locka Public Works Department and Miami-Dade Water and Sewer Department

Re: Glorieta Gardens - Account 2745714336, Meter 61302354, Building 8 / 13200 Alexandria Drive

Dear Public Works and WASD Billing Review Team,

We are requesting a corrected billing review and credit for the Building 8 water and sewer account at Glorieta Gardens. The disputed period covers the vacancy and rehabilitation window beginning in April 2024 and continuing through January 2026, when Building 8 was not operating as an occupied residential building.

The owner-side record shows that the account was billed using estimated usage of approximately 216,000 gallons per month during a period when ordinary residential consumption could not have occurred. The July 23, 2026 dispute letter identifies a \$95,017.57 retroactive rebill and a \$113,874.41 unpaid balance. ProjOS Water Intelligence has indexed the available WASD statement backup and currently shows 4,764,000 gal and \$100,386.80 in current charges tied to Account 2745714336 within the dispute window.

Our request is straightforward: please remove charges that are not supported by actual consumption, actual meter reads, or a reasonable service-location consumption basis for the period when the building was condemned, vacant, and under rehabilitation. Where actual reads are unavailable, please apply the corrected-billing principles in WASD's rules using actual consumption from a comparable service-location period or average anticipated consumption appropriate to a vacant building, not an occupied multifamily building.

We also request the meter-change work order, installation date, starting register reading, read history, estimate basis, adjustment worksheet, payment ledger, late charge ledger, and any internal investigation notes used to support the rebill.

Until the review is complete, please suspend any past-due classification, late charge escalation, collection action, discontinuance process, or adverse account action related to the disputed estimated amount.

Respectfully,

APAS Consulting LLC
